Quality in every step

LEAN WORKSHOP FOR TEAMS

Lean Training & Value Stream Mapping Workout

A hands-on workshop that teaches Lean thinking and puts it straight to work on your own value streams — starting with pre-work to understand how your processes run today.

DURATION	HOURS	FORMAT	INCLUDES
2–3 days	14–20 hrs	On-site workshop	Process pre-work

Who should attend

- Process owners and operations managers
- Cross-functional teams that share a value stream
- Continuous-improvement and quality leads
- Leaders planning a Lean transformation

What you will be able to do

- See waste and value from the customer's point of view
- Map the current state of a real value stream
- Find bottlenecks, delays and hand-off problems
- Design a leaner future state
- Leave with a prioritised improvement action plan

Pre-work on your processes

Before the workshop we review your process documents and data and speak with process owners, so exercises use your real value streams rather than generic cases.

Tailored length

Two days (14 hours) for training plus one value stream; three days (up to 20 hours) for deeper mapping or more than one value stream.

DELIVERED FOR LEADING PLAYERS IN

Supply chain · Insurance & risk services · Banking & financial services · HR & payroll outsourcing · Healthcare services

HOW IT WORKS

1
Pre-work
Understand your processes, data and pain points.

2
Lean training
Core concepts and tools, using your examples.

3
VSM workout
Map the current state and design the future state.

4
Action plan
Prioritised improvements with owners.

WHAT THE PROGRAMME COVERS

Tools & concepts

Lean foundations
5 Lean principles · 8 wastes (TIMWOODS) · Value-added vs non-value-added · Gemba walk

Value stream mapping
SIPOC · Current-state map · Future-state map · Lead-time ladder · Information & material flow

Flow & pull
Takt time · Cycle time · Bottleneck analysis · Line balancing · WIP limits · Kanban / pull

Workplace & standard work
5S · Standard work · Visual management · Mistake-proofing

Problem solving
5 Whys · Fishbone · A3 thinking

Improvement & sustain
Kaizen planning · Action plans · Daily huddles · Sustaining gains

AI-ENABLED

New tools you will use
AI speeds up the pre-work and the follow-through, while the mapping itself stays hands-on with your team.

AI summaries of interviews & gemba notes · Process-mining views of system data · GenAI drafts of standard work & SOPs · AI-assisted A3s and action plans

Run a Lean / VSM workout with your team

Tell us about the processes you want to improve and your team size. Prices on request.
